

The screenshot displays the Wireshark network protocol analyzer interface. The top menu bar includes File, Edit, View, Capture, Analyze, Statistics, Help, and a search bar. The top toolbar contains icons for various functions like opening files, saving, and zooming. The main window is divided into three panes: a packet list on the left, a packet details pane in the center, and a packet bytes pane on the right.

The packet list pane shows a list of captured packets. The selected packet is packet 1647, which is an HTTP POST request from 192.168.254.239 to 192.168.254.239. The packet details pane shows the structure of the HTTP request, including the request line, headers, and body. The packet bytes pane shows the raw data of the packet.

The selected packet details are as follows:

- Frame 1647:** Ethernet II, Src: Intel(R) Ethernet Controller (3:0:1:0), Dst: Intel(R) Ethernet Controller (3:0:1:0), Length: 1440, Captured: 1440 bytes on interface (eth0), Time: 0.000000000.
- Hypertext Transfer Protocol:** POST / HTTP/1.1 (application/x-www-form-urlencoded)

The packet bytes pane shows the raw data of the packet, which is a valid HTTP POST request.

Running from 192.168.254.239
